MAKE YOUR VERY OWN PHOTO KALEIDOCYCLE

for complete directions with pictures go to foldplay.com (click on kaleidocycle).
watch the slide show before constructing your first kaleidocycle.

detailed instructions,
illuminating videos,
& more fun stuff at

- 1) print on light cardstock or standard printer paper.
- 2) score all vertical and diagonal lines before cutting.
- 3) cut out figure on heavy black lines.
- 4) fold all vertical lines with printed side together. (valley fold)
- 5) fold all diagonal lines with blank side together. (mountain fold)

- 6) gently encourage the model into a tubular form by pushing the two points labeled A towards each other.
- 7) glue the diamond-shaped point A onto to white triangle A.

SUMMARY OF DIRECTIONS

- 8) glue the diamond-shaped points B and C onto to white triangles B and C.
- 9) bring the tab D to edge D forming a ring. glue the printed side of tab D to the blank side of edge D using the vertical fold as a guide. don't make the ring too tight. the picture overlaps a bit to give the model play.

- 10) glue the printed side of tab E to the blank side of edge E using the vertical fold as a guide.
 - 11) glue the the diamond-shaped point F onto to white triangle F.
- you're done! (after the glue dries.)
pull on the outside edge while pushing up from underneath to "turn" your kaleidocycle.
